

EMR|OIS|PACS Meaningful Use for Humble Budgets

Prowess Inc. Announces Its Web-Based EMR|OIS|PACS Meaningful Use Certified Solution

Concord, CA, October 2012 – **Prowess Inc.**, Developer of Oncology software solutions, focused on simplifying the daily clinical workflow, adopting the existing processes and the ongoing business demands of cancer treatment centers worldwide; will be showcasing its web-based **Panther EMR|OIS|PACS Meaningful Use Certified*** solution at the annual meeting of the American Society for Radiation Oncology (ASTRO) 2012 being held in Boston.

Competitively priced, the Panther solution is an affordable electronic medical record solution for all oncology practices, from the solo practitioner to multi-location cancer centers, clinics and medical universities. Panther EMR|OIS|PACS is more than cost effective, it improves patient care and increases revenue by providing a customizable, easy to implement, easy to train and highly reliable computerized patient charting system. The solution combines the management requirements of patient information and data sharing, practice management, e-Prescribing, and CPOE (Computerized Physician Order Entry). It saves Providers, Mid-Levels and Clinicians priceless hours and decreases duplicative tasks and documentation.

The Panther solution improves quality control with top notch scheduling capabilities, paperless practice management and robust reporting tools. Our DICOM compliant solution is fully interoperable with LINACs and imaging devices; enabling IGRT and treatment delivery. It allows providers to effectively manage patient medications, contraindications, and allergies, transmits patient prescriptions to local pharmacies for pick-up by the patient, enter electronic lab orders and manage results. Billing is simplified and efficient with an unparalleled automated platform designed with error prevention measures; resulting in higher staff productivity and increased medical claim reimbursement and cash flow.

Panther EMR|OIS|PACS is the most intuitive and easy to navigate solution that embraces the existing clinics' workflow and empowers the oncology staff to coordinate quality care through patient engagement tools that display, monitor, and share instant critical information anywhere, at any time.

*Scheduled to attest for Stage 1 Meaningful Use in December 2012

About Prowess Inc.

For more than 20 years, **PROWESS Inc.** has been trusted by doctors worldwide to provide advanced and innovative Windows-based software solutions: radiation treatment planning (TPS), oncology information system (OIS) and record-and-verify (R&V) and is expanding beyond the Radiation Workflow to include the entire Oncology Department Workflow needs.

Prowess Inc is headquartered in Concord, California. Under the leadership of CEO John Nguyen, Prowess is the pioneer in Oncology software solutions including its patented DAO IMRT technology, the only Real-time Adaptive Radiation Therapy (RealART) planning, the very first in Windows 7/64 bit-based TPS, and a ribbon workflow driven interface throughout its product portfolio.
