John C. Nguyen, President
Prowess
1370 Ridgewood Dr. #20
Chico, CA 95973

Dear Mr. Nguyen,

Mr. Remya Krishnan requested a letter from a clinical site that has had Prowess treatment planning installed for over two years. We have used a Prowess system here at Community Hospital for over 5 years now for standard, conformal and brachytherapy treatment planning (upgrade from ROCS/NOMOS RAPTOR) and have been extremely pleased with the unit. I have had several assistants and a consultant learn and use the system quickly since that time (including me). We have found it to be fast, accurate, simple to use, and very user friendly. We like the fact that the system runs on a PC platform in the MS Windows environment so it is easy and inexpensive to migrate to newer computers. We have found your customer support to be excellent, even during the time when Allient's problems caused you to shut down. We have two digital Siemens accelerators and LANTIS in our Radiation Oncology Department in addition to a dedicated AcQSim/VoxelQ system. We have found the Prowess system to integrate seamlessly into all our systems. We do extensive brachytherapy also and like to complement (and verify) the Nucletron HDR treatment with the Prowess 3D calculations. The physicians also really like the Prowess system.

Sincerely,

A handwritten signature in black ink, appearing to read 'Eric Zickgraf'.

Eric Zickgraf, Ph.D., FACR, FAAPM, Director
Medical Physics Department
Radiation Safety Officer
