

Panther OIS Oncology Information System

"Panther's OIS intuitive user interface allows for a seamless, paperless workflow."

"Up-to-date treatment information helps clinicians to closely monitor patient progress"

Millions of cancer patients' lives depend on the efficacy of radiation therapy received from their trusted clinicians. Striving to provide the best possible care, oncology departments rely on cutting-edge technologies that set new standards in care and efficiency. Panther OIS is Prowess' Oncology Information System. Panther OIS provides up-to-date patient information while preserving radiation treatment data and scheduling of patients. Panther OIS provides on-demand access to authorized personnel and allows therapists to quickly schedule plans for treatment delivery. Easy and intuitive, Panther OIS simplifies the clinical workflow and allows your team to focus on their number one priority – the patient.

As an independent provider of oncology solutions, Prowess Inc. has developed a revolutionary approach to managing oncology workflow. Our innovative approach simplifies departmental workflow, allows the user to concentrate on patient care and improves IT efficiency.

Departmental Workflow - Intuitive and patient-centric software guides the user through the clinic's daily activities

- Easy to navigate user interface
- Paperless charting
- Electronic notes and attachment storage
- Patient and resource scheduling
- Billing and charge code management
- HIPAA compliant

Patient Care - Provides a simple and comprehensive set of tools to access the specific data needed at any time

- Radiation oncology specific EMR
- Diagnosis and Staging
- Treatment Verification
- Image review (IGRT)
- Treatment record management
- Treatment Progress Visualization
- Dose tracking and dose based alerts

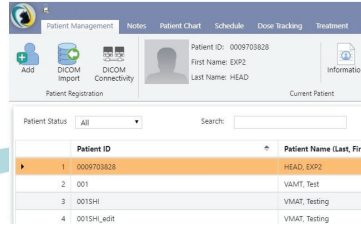

IT Efficiency - Highly flexible multi-client environment allows ease of system set-up and low maintenance

- Short installation and configuration times
- Short training time for all users
- Standalone or networked configurations
- Centralized database
- Easy backup and restoration of patient database
- Simple patient level data archival process
- Cloud backup of patient data (only available/accessible in China)

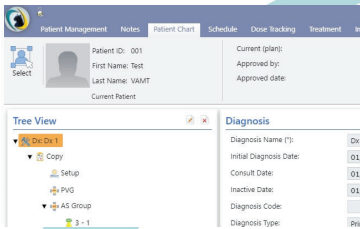

Device Connectivity - Reduces the chance of "human error" related mis-treatments by electronically sending and receiving treatment parameters

- DICOM RT 3.0 Import from treatment planning systems
- OIS Interface for OUR, Shinva and Varian R&V Systems

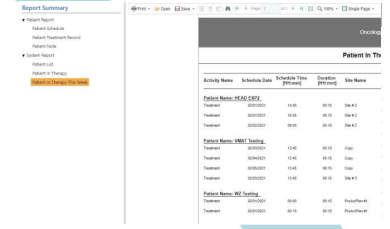

Panther OIS Modules

Patient Management
*Registration, Plan Import,
 Patient Demographics, Patient Notes*

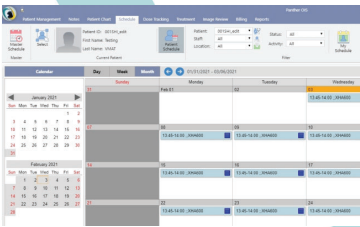

Patient Chart
*Diagnosis, Staging, Prescriptions,
 Treatment Modalities, Plan Details*

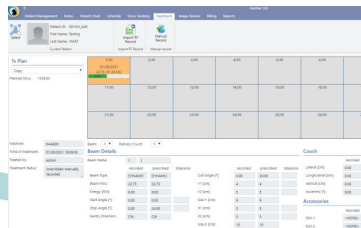

Reports
*Generate Complete Patient Charts,
 Supports Customized Report Scripting*

Data Management
Centralized Storage, Archival, Restoration

Scheduling
*Patient, Staff & Treatment Device Schedules,
 Conflict Detection and Resolution*

Treatment Management
*Records, Progress Visualization, R&V Device
 Connectivity*

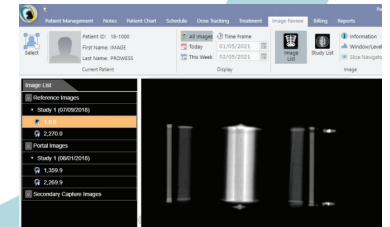

Image Review
*Image Storage and Viewer,
 IGRT Support, Study Approvals*
